DETAILED ACTION

Response to Arguments

Applicant's arguments with respect to claims 1, 2, 4 and 5 have been considered but are moot in view of the new ground(s) of rejection.

Despite applicant's disagreement, the examiner decides to provide new rejection as below. Other references have been incorporated to strengthen the examiner's position with respect to the computer-readable medium containing programming instructions for controlling brightness from a display unit.

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1, 2, 4 and 5 are rejected under 35 U.S.C. 102(b) as being anticipated by Lee (U.S. Patent number 6,091,397).

Regarding claims 1 and 4, Lee discloses a computer-readable medium containing programming instructions and method for controlling brightness from a display unit, the programming instructions comprising:

calculating a display brightness in a certain window displayed on a screen of said display unit (using element (23); Figs. 4 and 12, col. 14, lines 32-67); and

controlling said display unit (using element (40); Fig. 4) so as to change said brightness of said display unit according to said calculated display brightness.

Regarding claims 2 and 5, Lee discloses a computer-readable medium and method wherein the programming instruction further comprising:

using a power management function (using Display Power Management System DPMS) for controlling said display unit so as to change said screen brightness of said display unit (Fig. 10, col. 12, lines 30-67).
